SURROUNDING, NOTABLE INDUSTRIAL OCCUPIERS

WHY CLEARWATER LOGISTICS CENTER?

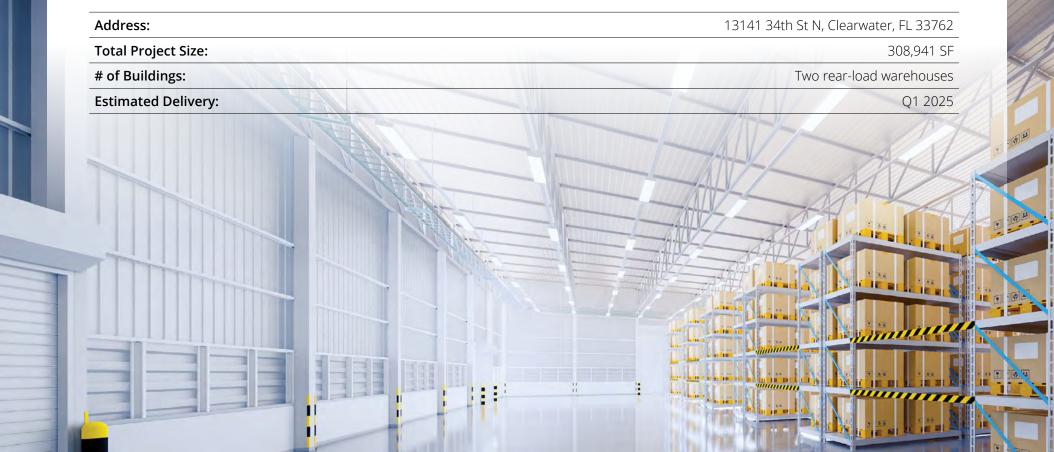

Situated on 34.5 acres, Clearwater Logistics Center is **strategically located in the heart of the most densely populated County in the entire state of Florida,** with almost one million people living on the Pinellas peninsula.

Pinellas County is a 274-square mile peninsula bordered by the Gulf of Mexico and Tampa Bay with a few core arteries connecting the county to the MSA. Clearwater Logistics Center sits in the heart of the Gateway Industrial submarket with proximity to Interstate-275

("I-275"), the major elevated highway running through Pinellas County to connect to the major neighboring Counties, Hillsborough (1,552,366 population) and Manatee (444,143 population). It's exceptional connectivity to the residents of Tampa Bay has driven the mid-Pinellas direct vacancy rates to 2.7% (as of Q2 2024). Recognizing the tremendous occupier demand for additional industrial space, LBA Logistics will be delivering two state-of-the-art warehouse facilities in Q1 of 2025.

INFRASTRUCTURE IMPROVEMENTS UNDERWAY

Gateway Expressway Project

As the most densely populated county in the state of Florida, Pinellas County began the \$595M Gateway Expressway Project in 2017 which will provide better connectivity throughout the county by creating two new elevated tollways between US Highway 19 and I-275, as well as the Bayside Bridge and I-275. The project component along I-275 includes the design and construction of one tolled express lane in each direction (one northbound and one southbound) from south of Gandy Boulevard to north of 4th Street

North. The new express lanes are in addition to existing general purpose (non-tolled) lanes.

SR 690 will be a new 4-lane tolled expressway connection from US 19 to west of I-275. The tolling will be "static," meaning the cost will remain the same at all hours. SR 686A will be a new 4 lane elevated tolled (static) expressway from the Bayside Bridge (CR 611) to just west of I-275. Completion is slated for Q2 2023.

Howard Frankland Bridge

Florida Department of Transportation (FDOT) is rebuilding the existing northbound bridge, which was originally constructed in 1959, and adding capacity to alleviate traffic congestion.

As one of the primary connectors between Hillsborough and Pinellas County, the Howard Frankland Bridge (I-275) is undergoing a \$865M redesign, which will expand the southbound bridge to allow for eight lanes. Completion is slated for Q4 2025.

New design benefits include:

- Improvement of incident management in emergency responses
- Hurricane evacuation plans to utilize all lanes
- Improved operations of Express Bus Service
- Includes a bicycle/pedestrian trail
- Future light rail designs
- Additional express lanes
